ABOUT ME

I am a committed, hard-working individual, and I am proud of my abilities to empathise and listen to those around me. I am always eager to learn something new, and looking for opportunities to expand my toolset of skills and abilities.

My love for programming comes from my passions for creative expression and technical problem-solving. For me, nothing is more satisfying than taking a difficult a problem, breaking it down, and moving through each step until it is solved.

EDUCATION

Arts University Bournemouth, BA (Hons)- Film Production 2014 -2017

School of Code – 2022

On this 16-Week Bootcamp, I gained experience with a plethora of programming languages, libraries and frameworks that are highly relevant in the modern tech industry, applying them in practical workshops, working in pair-programming situations as well as larger group projects. Whilst building functional, full-stack applications, we studied and implemented Agile techniques, such as continuous ideation and user-focused design. I also gained a variety of invaluable soft skills, such as a drive for self-improvement, a confidence to direct my own learning, and a discipline to approach difficult problems with an open and creative mind.

EXPERIENCE

Personal Projects- 2022 - 2023
Just my Type- A single page React JS App designed to help improve people's speed typing.
https://visionary-klepon-ded6d3.netlify.app/

Split The Bill- A Vue JS app, to help people split their restaurant bill.
https://bill-calculator-ecru.vercel.app/

School of Code Project- 2022
RecApp- A full-stack PERN App that allowed SoC boot-campers to search for helpful links for coding related pages, and look up a glossary of Coding Terms. Built in one week with a team of five using agile development practices.

Bar Supervisor, Griffin Catering– 2019 - 2022
Running shifts, cashing up, and providing professional customer service in various pubs.

TECHNICAL SKILLS

> HTML5	> NodeJS	> ExpressJS
> CSS	> ReactJS	> PostgreSQL
> VueJS	> Javascript	> Auth0

SOFT SKILLS

> Agile Methodology
> Honest and Open Communication
> Taking and Providing Constructive Criticism
> Independent and Collaborative Problem-solving
> Test-driven Development

INTERESTS

In my spare time I enjoy playing Dungeons & Dragons, reading fantasy novels, and hiking up mountains.

WHAT'S NEXT

I am always looking for new technologies to explore or ways to take what I already know to the next level. Currently I am learning Tailwind CSS, and React Native.
